

Automated Cybersecurity Examination Tool (ACET)

PLATFORM FEATURE UPDATE

Adlumin users can now access the **Automated Cybersecurity Examination Tool (ACET)**, which was built according to the National Credit Union Administration's guidelines. The ACET portal assess the cybersecurity maturity of your organization and prepares you for the NCUA's cyber examination requirements.

The new ACET tool includes a larger cybersecurity maturity section, which is broken down into smaller categories.

Features include:

- An interactive tool that allows multiple Adlumin dashboard operators to simultaneously update the form in a collaborative manner.
- The ability to save your progress as questions are completed.
- See your organization's current ratings at a glance.
- Generate and print a PDF report as Inherent Risk and Cybersecurity Maturity, or a combined ACET report.

Adlumin's new ACET tool helps users easily manage compliance needs and becomes your system of record.
