

## / GRAHAM FLASPOEHLER

### Senior Software Developer at Adlumin Inc.

Graham Flaspoebler is a Senior Software Developer at Adlumin Inc., a cybersecurity technology firm that focuses on revolutionizing how corporate institutions secure sensitive data and intellectual property while achieving their compliance objectives through its security and compliance automation platform. Flaspoebler is responsible for working on the user-facing rails application, and he also maintains the application and develops new features and reports for users.

Before making a career in software development and joining the Adlumin team, Flaspoebler worked as a paralegal specializing in trade law. He managed the preparation of submissions filed in trade proceedings before the Department of Commerce, International Trade Commission, and more.

When he is not developing new features, you can find him reading, running on the National Mall, cooking, or doing something that vaguely resembles yoga.
